

Manzili / منزلي

Business Model Canvas

Customer Segments

Given the niche nature of the Egyptian handicraft industry, our primary customer segments are focused on:

Producer/Seller Segments:

- **Individual Artisans** (e.g. traditional weaver, Modern Potter, Jewelry Smith, ...)
- **Home-Based/Small Businesses** (e.g. Boutique Embroiderer, Woodworking Shop, ...)

Consumer/Buyer Segments

- **Value-Driven Buyers** (Ethical and Eco-Conscious Egyptian Handicraft)
- **Trend-Driven Aestheticists** (focuses on style, uniqueness, modern trends)
- **Purposeful Gifters** (giving meaningful, unique gifts)
- **Story Collectors** (e.g. who deeply respects the difficulty of the craft)

Value Proposition

For Egyptian Artisans:

- A platform built **solely for handmade** goods, no mass-market noise.
 - A hassle-free, **zero-friction selling window**: upload products, set prices, manage orders, all in one place.
 - Access to custom order fulfillment: Buyers **request bespoke pieces**, and artisans accept, negotiate, and deliver directly, unlocking premium revenue.
 - All artisans are **vett ed and approved**.
 - Exposure to buyers who seek not just products, **but stories**, heritage, and craftsmanship.
- Artisan's target customers

For Buyers:

- A marketplace **specialized for handcrafted items**, all made by verified Egyptian artisans.
- Access to a wide range of **categories**: weaving, pottery, jewelry, woodworking, and more.
- The ability to **commission one-of-a-kind pieces**: Specify design, materials, size, details, and work directly with the maker.
- **No mass-produced goods**. Only real craft, made by love.

Core Differentiator:

- The **only platform in Egypt that unites standard sales, custom commissions and advanced AI tools under one roof**, Enabling artisans to earn more, and buyers to own something truly personal.

Channels

Manzili reaches users through its **web and mobile app**, the core platform where buyers browse, order, and commission, and artisans list, manage, and deliver. Discovery happens via **App Store (Google Play)**, where reviews build trust.

Social Media:

- Demand is fueled by Instagram and TikTok showcases of handmade pieces (via Reels showing the making process).
- Artisans are recruited through targeted Facebook groups (via targeted DMs to #EgyptianHandmade and #MadeInCairo groups) and local craft networks.

Retention is driven by **email** and in-app notifications for order updates

Customer Relationships

Self-Service:

- **Product Discovery & Browsing:** Includes search functionalities, filters, etc...
- **Order Tracking:** Status updates, and access to order history.
- **Account Management:** Involves managing profile information, preferences, and saved items.

Community-Driven:

- **Product Reviews:** Facilitates buyer feedback and enhances transparency.
- **Storefront Profiles:** Showcases the unique background and stories of creators, highlighting their craft heritage.

In-site Interaction:

- **Custom Order Consultation:** Allows for buyer-artisan negotiations through Direct Messaging.

Support:

- via **"contact us"** page, resolves customer issues and answers questions. Check our FAQ for common questions.

Revenue Streams

Manzili earns revenue through a 15% commission on every standard sale and a 10% fee on custom order transactions. and optional paid time-slots for products featured on the homepage.

Collected at the time of buyer payment or feature booking. No upfront fees for artisans. No subscription tiers. Revenue flows only when a sale closes or a promotion is selected.

Key Resources

- **Platform & Database:** The Next.js **web** and Flutter **mobile application**, which both based on **central database** organizing vetted artisans, handmade categories and items.
- **Graduation Project Team:** the team **wears all the hats**: acting as the software engineers, community managers recruiting the first artisans, and the quality control team ensuring products meet the strict "handmade" criteria.

- **Development & Cloud Provider:** The complete suite of tools and environments required to build, test, and host the platform. This spans from ecosystem like **VS Code** to the containerization of **microservices via Docker** and the web hosting on platforms like **AWS**.

Key Activities

Artisan Vetting & Onboarding:

- Verify every artisan is a genuine handmade maker

Design and refine the custom order process:

- so buyers and artisans can collaborate without confusion.

Buyer Acquisition & Retention:

- Attract and retain buyers seeking unique, handcrafted items

Key Partners

Payment Gateway Providers:

- Securely process payments, split revenue, and ensure financial trust between buyer and artisan. (Stripe, or Egyptian local processors like Fawry)

Local Courier & Delivery Services:

- Physically deliver handmade goods from artisans to buyers with tracking and reliability. (Aramex, or regional logistics providers)

Cloud Hosting & Infrastructure Providers:

- Provide the stable, scalable technical foundation for the web and mobile platforms.

AI Providers:

- Supply the artificial intelligence necessary for custom order review and image generation features.

Cost Structure

Cost Structure

The Cost Structure defines all the expenses a business incurs operating and delivering value to customers. It helps in understanding the financial feasibility of a business and identifying opportunities to optimize costs.

AI Service	Cost of powering the AI features
Hosting & Infrastructure	Monthly costs for web hosting, database storage, and domain registration. Ensures the platform remains accessible 24/7.
Development, Maintaining and Recruitment	The cumulative cost invested in building, maintaining, and growing the platform, including verifying artisans, onboarding users, and resolving issues.
